

YUNXI LAI

Physician-Scientist | Research Associate

Zhongshan Ophthalmic Center, Sun Yat-sen University, China

Email: laiyx29@mail2.sysu.edu.cn | Website: <https://yunxilai.github.io/>

EDUCATION

- Jul 2023–Jun 2026 **DOCTOR OF CLINICAL MEDICINE, Ophthalmology**
Zhongshan Ophthalmic Center, Sun Yat-sen University, China
Thesis: *Transformation from Clinical Data to Scientific Evidence Enabled by Large Language Models in Ophthalmology*
- Sep 2020–Jun 2023 **MASTER OF MEDICINE, Ophthalmology**
Zhongshan Ophthalmic Center, Sun Yat-sen University, China
Thesis: *Analyses of Routine Preoperative Blood Testing in Ocular Patients*
- Sep 2015–Jun 2020 **BACHELOR OF MEDICINE, Clinical Medicine**
Guangdong Medical University, China

RESEARCH EXPERIENCE

Clinical AI and Large Language Models | Jul 2023–Jun 2026

Development, Validation and Implementation of an Ophthalmic Large Language Model

- **Co-developed an ophthalmic large language model and evaluation benchmarks** for assessing question-answering performance; co-authored the resulting article in *JAMA Ophthalmology* (2024).
- **Conceived its clinical application as a pre-consultation tool**, designed an agent to actively elicit and document medical histories, and integrated it into existing outpatient workflows and hospital systems.
- **Led clinical validation through a randomized controlled trial**, including protocol and statistical analysis plan development, ethics and trial registration, Python-based data processing, statistical analysis in R and trial operations; co-first-authored the article in *npj Digital Medicine* (published online 05 October 2026).
- **Coordinated multidisciplinary collaboration** across grant applications, intellectual property and public outreach, contributing to app deployment serving over 1.7 million people across four countries and to the project's selection as a Chinese digital health case study at the 2025 World Health Assembly.

Epidemiology | Sep 2021–Jun 2023

Routine Preoperative Blood Testing in Ophthalmic Surgery

- **Independently conducted a retrospective study** evaluating the necessity of routine preoperative blood testing and the applicability of *Choosing Wisely* recommendations to ophthalmic surgery in China.
- **Analyzed and interpreted data from 102,542 patients**, resulting in a first-author publication in the *British Journal of Ophthalmology* (2024).

Cohort Studies | Aug 2023–Mar 2026

Pediatric Cohort for Ocular Monitoring in Rare Systemic Diseases

- **Co-led a cross-institutional ophthalmology–pediatrics cohort study** to monitor ocular changes in children with rare systemic diseases receiving glucocorticoids or hydroxychloroquine; responsibilities included ethics approval, participant recruitment, ophthalmic examinations and longitudinal data management.
- **Co-established and managed a prospective cohort of more than 600 children**, with an average of seven follow-up visits per participant.
- **Designed an LLM-assisted extraction method with active data-quality control** to address inefficient longitudinal data extraction, converting discharge summaries into structured research variables; internally evaluated the method using retrospective inpatient records.

Cohort Studies | Nov 2023–Mar 2025

Community-Based Ophthalmic Cohorts

- Explained test results, offered medical advice and collaborated with local healthcare providers.

TECHNICAL & RESEARCH SKILLS

- **Computational and Statistical:** Python, R, SPSS; data processing, statistical modeling, reproducible analysis; AI-assisted coding and prototyping.
- **Human-Subjects Research:** Designed and conducted human-subject studies, including randomized controlled trials, prospective cohorts and retrospective analyses, from protocol development and registration to statistical analysis planning, data collection and analysis.
- **Clinical and Visual Assessment:** Comprehensive ophthalmic examination and imaging, including slit-lamp biomicroscopy, ophthalmoscopy, optical coherence tomography and scanning laser ophthalmoscopy; experience across emergency, inpatient and outpatient ophthalmic settings.
- **Project Management and Interdisciplinary Collaboration:** Coordinated timelines and deliverables across clinical, technical and industry teams; integrated expertise from different disciplines to advance project development and implementation.
- **Research Presentation:** Drafted, revised and published two first-author manuscripts in peer-reviewed journals; gave and received constructive scientific feedback.
- **Languages:** Chinese (native), English (fluent).

TEACHING & MENTORING

Teaching Assistant | Undergraduate Ophthalmology | Aug 2024 | Sun Yat-sen University

- Assisted in undergraduate ophthalmology teaching, including clinical case discussion, ophthalmic examination, and interpretation of common ocular findings.
- Supported students in linking core ophthalmic knowledge with clinical reasoning and patient assessment.

Instructor | Training for Junior Ophthalmology Residents | Aug 2024 | Zhongshan Ophthalmic Center

- Prepared teaching materials and provided hands-on instruction in essential ophthalmic clinical skills and procedures.
- Guided junior residents in clinical examination techniques, documentation and preparation for ophthalmology rotations.
- Demonstrated clinical workflows and supported trainees in developing systematic approaches to patient assessment.
- Mentored graduates in clinical research, literature review, data organization and scientific presentation.

SELECTED OUTREACH

Community Engagement and Public Eye Health | 2020–2025

- Contributed to community eye-health screening initiatives and public-facing communication for the ophthalmic LLM project, including content development and media promotion.
- Led visual identity and art direction for the official launch of the ophthalmic LLM and contributed to video planning, scientific content development and media communication for public dissemination.

(2026). Smartphone-Based 3D Ocular Reconstruction for Automated Quantitative Blepharoptosis Evaluation. *JAMA Ophthalmology*. Published online 24 September 2026.

CONFERENCE PRESENTATION

Lai, Y., Luo, M. J., Yu, Y., Pang, J., Bi, S., Lin, H. *Evaluating GPT-4o in ophthalmic consultation and documentation: Bridging knowledge with clinical practice*. Poster presented at: Association for Research in Vision and Ophthalmology Annual Meeting; May 2025; Salt Lake City, UT, USA.

LICENSURE & CERTIFICATION

Physician License: China.

National Standardized Residency Training Certificate: Ophthalmology.
